VUM SIMPLE NOTICE

Settings can be changed by clicking the switch button on the back of PCB.

Dislpay contrast_

Click 2 times quickly on the switch button to change the 3 display modes.

Display effect_

Hold the switch button for 2 seconds.

1. Strip mode, fall after peak
2. Strip mode, disapears after peak
3. Strip mode, no peak displaying
4. Strip mode, disapears to the right after peak
5. Ribbon mode
6. Strip mode, peak marked
7. Strip mode, jump two times to the right after peak and disapears

Factory reset_

Power-on the VUM. Hold the switch button for 10 seconds, release it then wait 5 seconds. Power-off the VUM.

Note_

In mono use, as the sampling goes in both channel simultaneous, the amplitude of the two lights bars may be a little different.

Important_

Cavisynth is not responsible for any damage to the module or to your power supply.
Please observe the following connection instructions carefully :
